

DOMAINE DES
GROTTES
DE TIAN

*Journey to the Origins
of the World*

AN IMMERSIVE EDUCATIONAL
PROGRAMME

2025
Belgium

Nature reveals itself... ... TO THE ENQUIRERS

250 hectares
of unspoilt nature

An enchanting stay

Explore the Cave of Han and embark on an adventure in the Wildlife Park... Wonder guaranteed!

“Take advantage of our personalized programs, tailored for all ages and abilities!”

Are you ready to travel to the origins of the world?

Themed workshops

Our packages include a variety of themed workshops, specially developed for all group ages and led by qualified staff.

All inclusive

Everything is included in the price: meals, accommodation, themed workshops, and visits to partner parks. You can even make your experience more exclusive with additional options, like a night in the heart of the Wildlife Park in our Tree Tents!

A real life laboratory

Enjoy a natural outdoor learning environment, with wonderful opportunities to take young people out of the classroom to a place where they can learn through experience, enquiry and observation.

STARTING FROM APRIL 2025

Tree Experience

REACH NEW HEIGHTS!

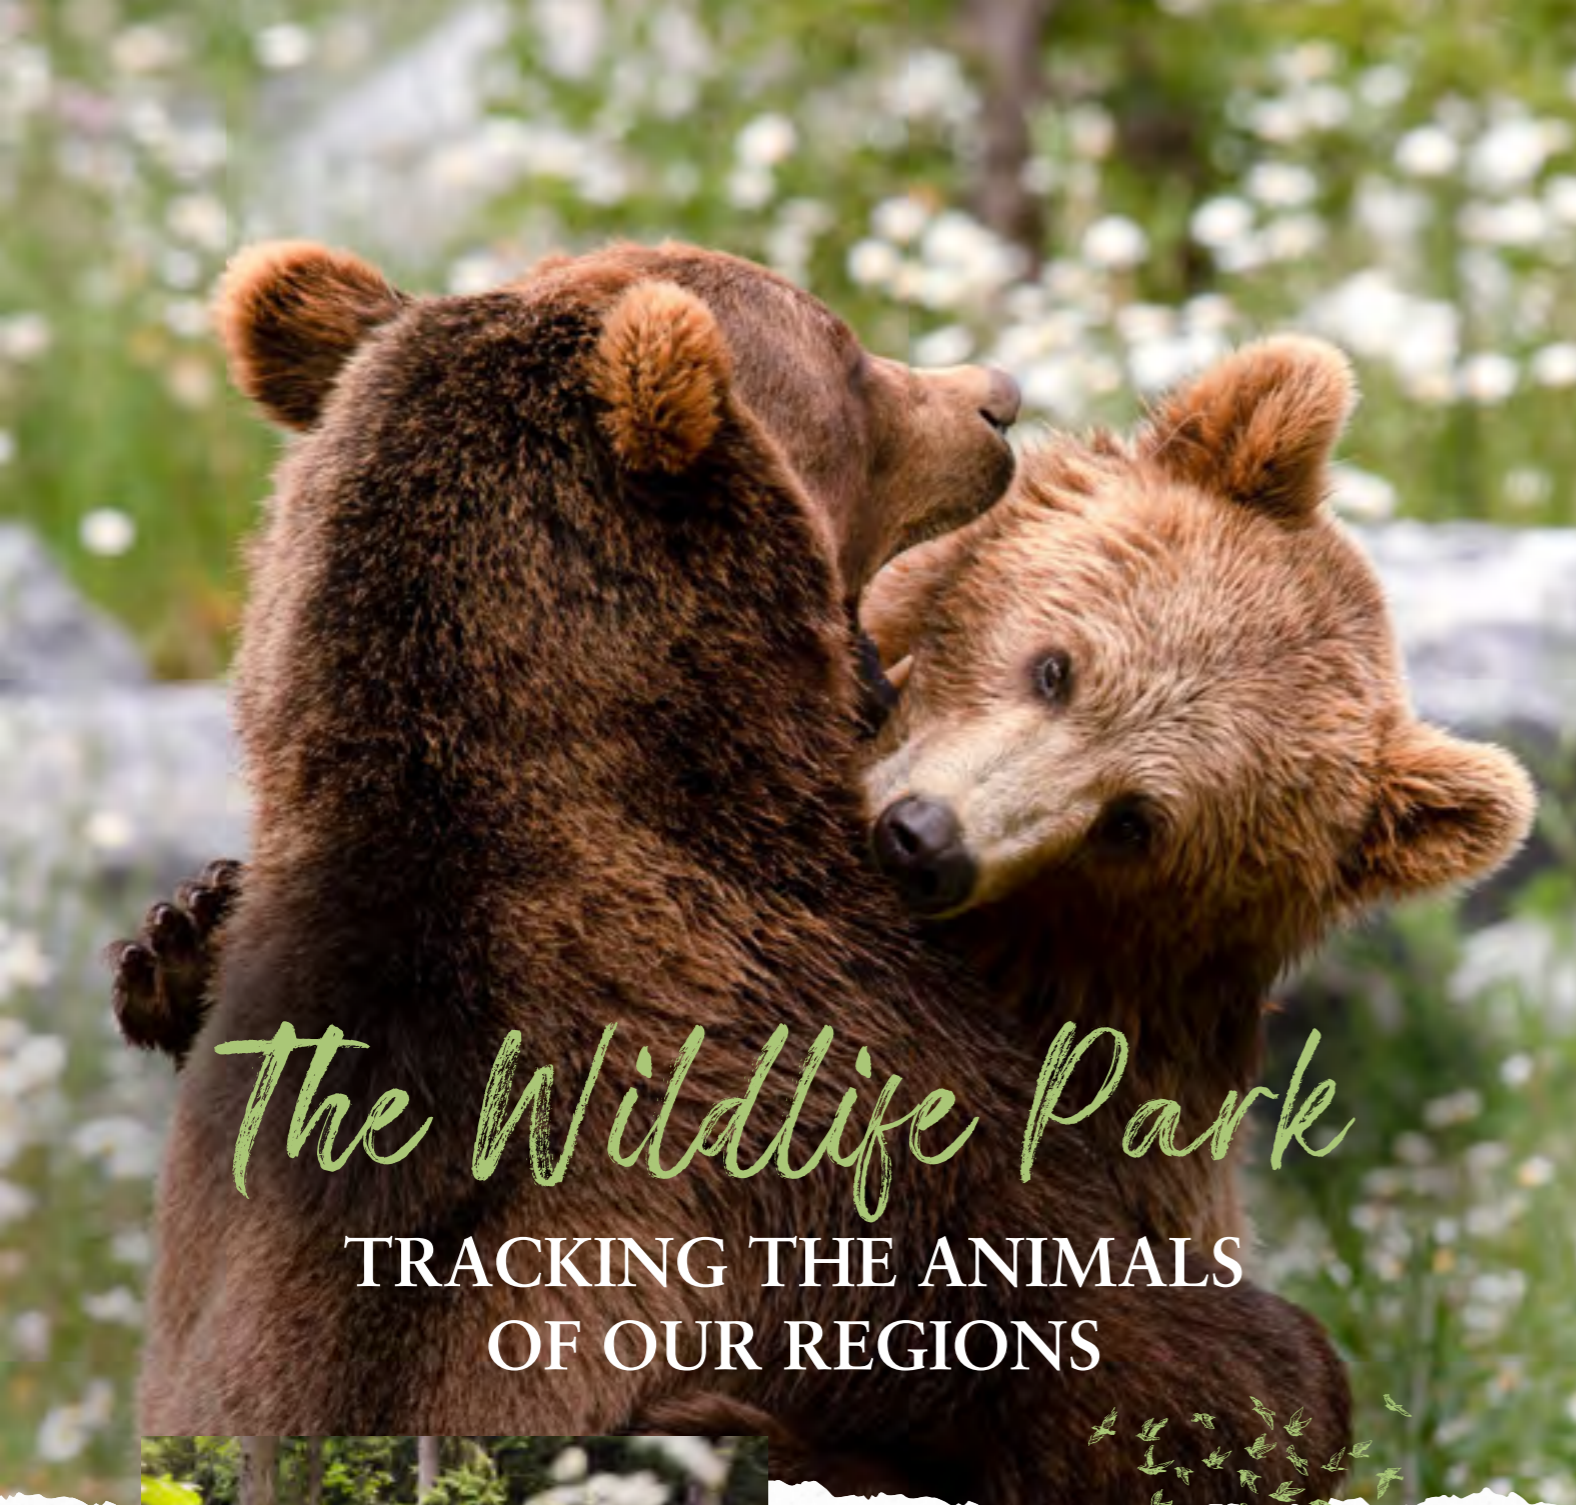

New!

More information:

3 adult courses and 2 children's courses (from 7 years old)

The Wildlife Park

TRACKING THE ANIMALS OF OUR REGIONS

Immerse yourself in 250 hectares of preserved nature

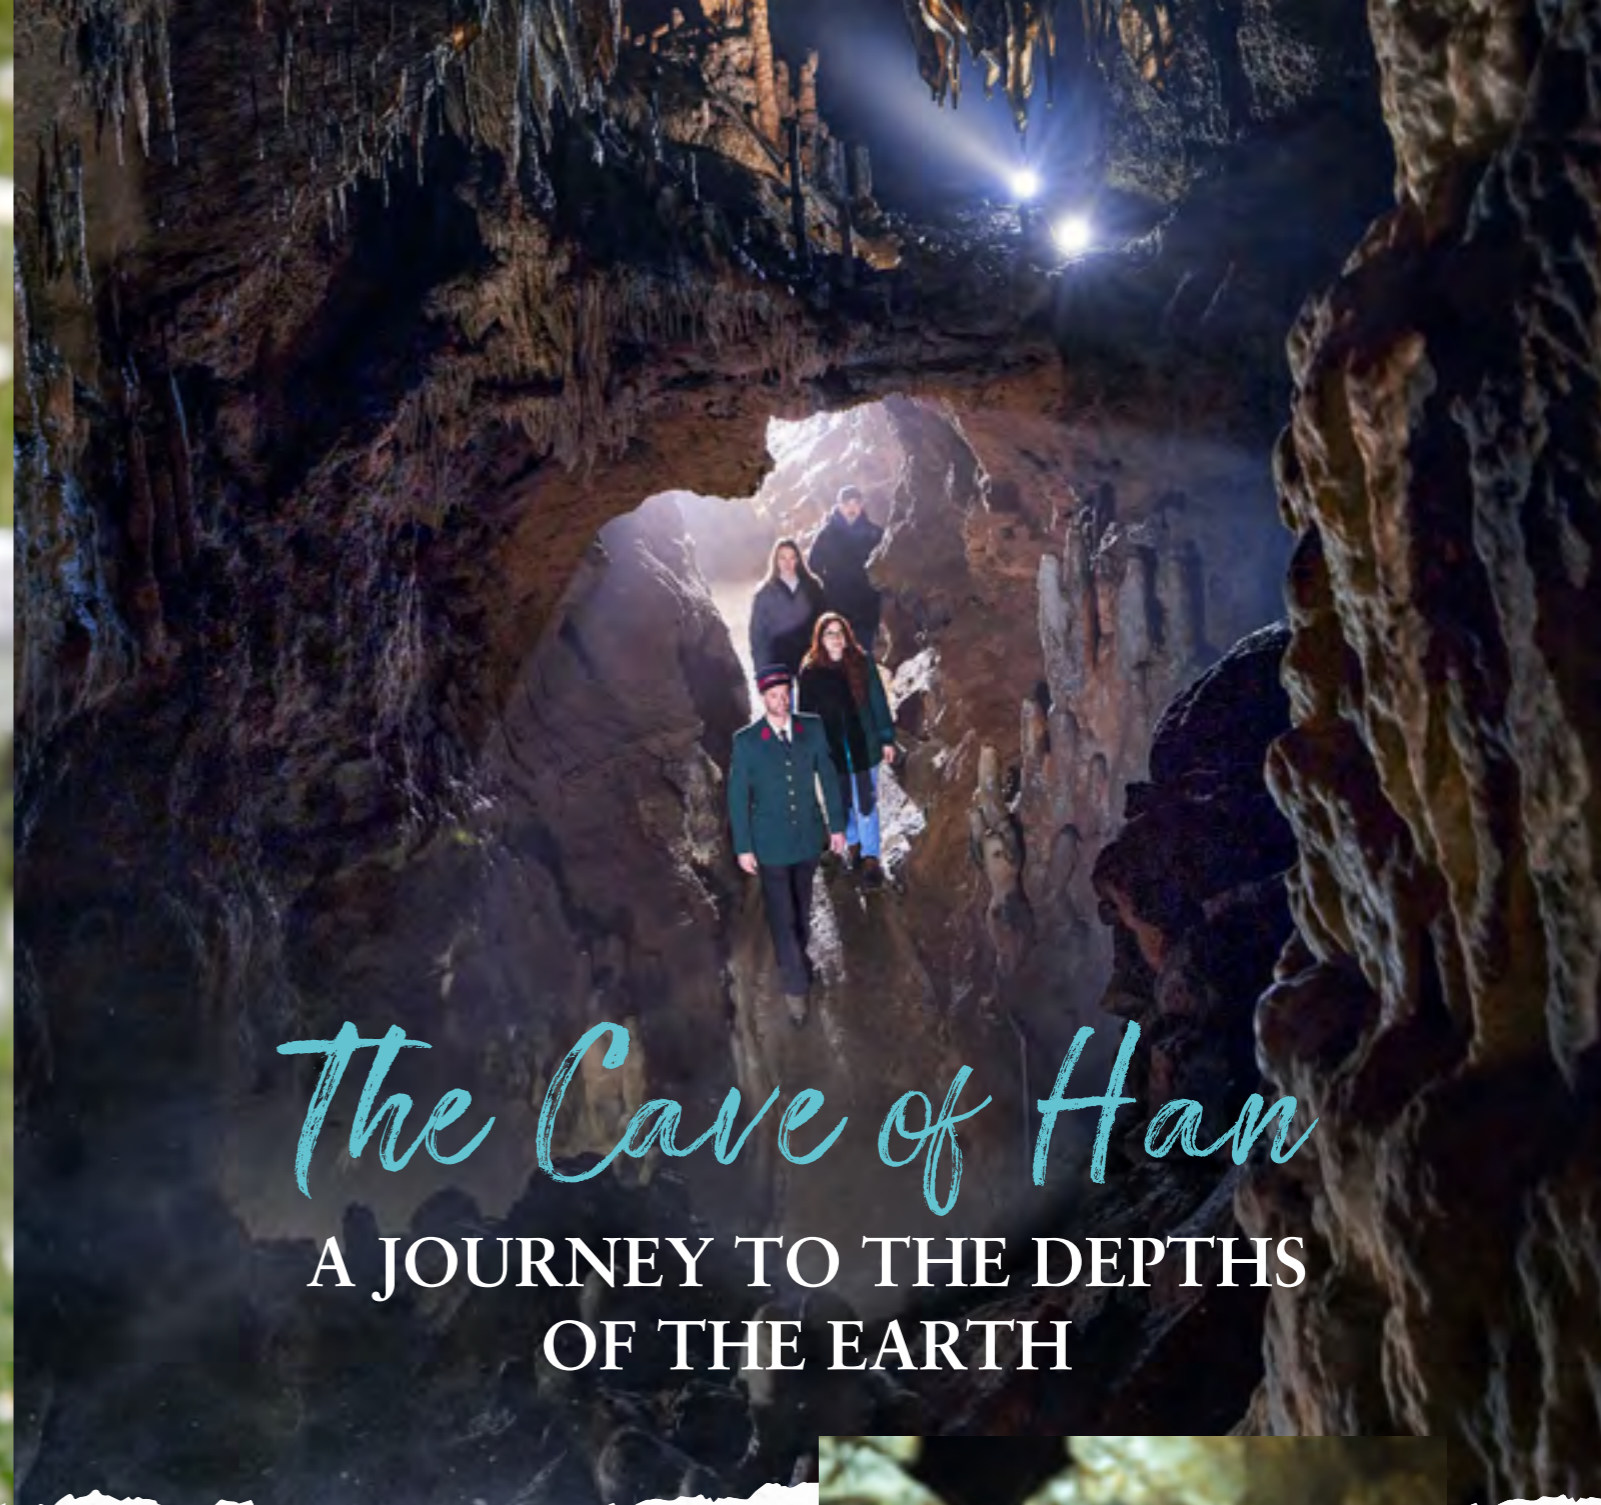

The students will be immersed in a biotope that has remained unchanged since prehistoric times. They will get to know many species that have populated our land for centuries, including the European Big 5: the brown bear, the wolf, the bison, the lynx and the wolverine.

A unique natural site

The river Lesse has not only forged the network of caves, but also the surrounding valleys of the Domain. The Wildlife Park is another jewel in the crown and part of the same eco-system.

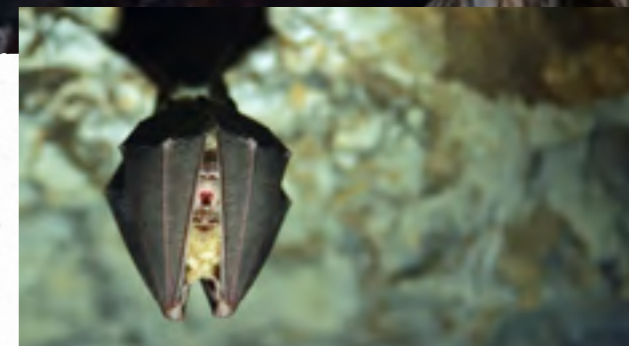

Animal conservation, reintroduction and raising awareness runs in our blood

From the most endangered wild bats, insects, butterflies to the European Big five: our Park is home to a number of threatened species, enabling us to participate in many conservation and reintroduction projects (WWF, European Endangered species Programme, Natagora...). Therefore, our Park is a European recognized conservation facility.

The Cave of Han

A JOURNEY TO THE DEPTHS OF THE EARTH

Exploring the wonders below

Discover the mysterious galleries and majestic chambers of Belgium's biggest cave! Included in the visit: the Origin sound and light show, 110 meters underground.

Knowledge of the underground world

The students will discover everything there is to know about the mysteries of rock and relief formation, the effects of rivers and rainwater, the life of our ancestors from the Bronze Age to the Roman era, and a wealth of other fascinating topics. Personal skills will be needed such as communication, risk taking and team building.

A living science lab

Han-sur-Lesse, in addition to begin a real laboratory for many researches, is also a high place for the exchange and diffusion of knowledge about the underground environment and nature conservation. The Cave of Han is a real-life laboratory where the future generation can learn and reflect in the field.
